

PRESS BRIEFS - May 26th, 2011

PUBLICATION	PAGE	HEADLINE & BRIEF
Nation	Pg 24	Wind farm to earn Kenya Sh4.2 billion
		Kenya is expected to earn about sh4.2 billion in carbon credit in a seven-year period from the 310 MW Lake Turkana Wind Power project. UN has approved sub-Saharan Africa's largest wind farm under a mechanism that will allow the project to generate carbon credits from its greenhouse gas emission reductions.

Nation	Advertising Feature	Fastest Growing Energy Technology
		The energy sector is as dynamic as they come. Indeed, few sectors of the global economy are changing as much as energy. In response to the challenges, the government announced raft of measures aimed at forestalling a crystallizing energy crisis and shifting to investment in renewable energy and other cheaper alternative energy sources, all which are expected to contribute greatly towards industrialization and vision 2030 goals.

Business Daily	Pg 3	China seeks to build nuclear plant in EA

		<p>China wants to help build nuclear power generation in East Africa, uranium mining and investment company IBI Corp said in a statement after meeting Chinese officials in Beijing, revealing China's undimmed appetite for oversea nuclear expansion despite the Japanese nuclear crisis this year. China is in the early stages of a massive nuclear power expansion to help meet the demands of its power-guzzling economy and to weaken the grip of coal as the dominant source of fuel.</p>
