People	Pg 2	Don't introduce nuclear energy, State advised
		The Green Belt Movement has urged the government to reconsider other ways of producing energy other than the nuclear energy, saying that Kenya has no capacity to secure its own borders. The movement Executive Director Prof. Karanja Njoroge said the intention by the Government to introduce nuclear energy as means of power production is uncalled for in Kenya as it is highly toxic.
Nation	Pg 48	Kenya not ready for nuclear energy project, claims lobby
Business Daily	Pg 13	Top UN officials root for green development projects in Africa
		After 50 years of development, 80 per cent of Kenya's population had no access to electricity. Now, after a 2008 shift to renewable energy, more Kenyans have access to electricity than ever before. Kenya's feed in tariff, similar to Germany's is expected to produce about 1300 MW of electricity generation capacity from biomass, geothermal, biogas, solar energy, wind and small hydro this year
