

## PRESS BRIEFS - October 26th, 2010

PUBLICATION	PAGE	HEADLINE & BRIEF
<b>Daily Nation</b>	<b>S/C Pg 5</b>	<b>Electrification to power growth in Kenya's rural areas</b>
		The publication reports rural electrification has increased from 4 percent to in 203 tp 12 percent in June this year. Rural Electrification Authority Chief Executive Zachary Ayieko said that the current connections stood at 64 percent and the company was targeting 100 percent.
<b>People Daily</b>	<b>Pg 12</b>	<b>Wind turbine colours pose threat for wild animals</b>
		According to the publication, a study has revealed that wind turbine's colours affects how many insects it attracts. This explains why the turbines kills batas and birds. Scientist have added that the turbines are mostly painted grey or white and kill the birds which get on to the path of the turbine blades
