| <b>The People</b> | <b>28</b> | <b>Electricity generation goes up by 13.4 percent</b>  |
|                   |           | According to the latest Monthly Economic Review by the Central Bank of Kenya, Kenya's electricity generation went up by 13.4 percent between January and August this year, but failed to meet the country's rising demand for energy. The bank using figures by the Kenya Bureau of Standard added that generation of electricity from thermal sources between January and August rose by 12.3percent. |
