

PRESS BRIEFS - October 27th, 2010

PUBLICATION	PAGE	HEADLINE & BRIEF
Business Daily	Pg 8	KenGen seeks license to expand power generation
		<p>The publication reports that KenGen is applying for new generation license as it intensifies plans to deliver additional 500MW of electricity in the next three years. KenGen's Managing Director Eddy Njoroge said that the applications are for the plants that are being worked on. He added that the company intends to triple its capacity to 1500MW by 2018.</p>
People Daily	Pg 11	Iran fuels its first nuclear power plant
		<p>According to the publication, Iran began loading fuel into the core of its first nuclear power plant. At the plant's inauguration in August 21st 2010, the country's Vice-President said that a leak in the storage pool had delayed the loading process however now the 1,000MW nuclear plant would begin generating electricity in 2011.</p>
