KGN-SEC-06-2017

TENDER FOR DESIGN, CONSTRUCTION, FABRICATION AND INSTALLATION OF SECURITY GATES, FENCES, GRILLS AND BARRIERS AT OLKARIA.

10 January 2018

CLARIFICATION NO.1

No.	Clarification	Response
1	The priced section of the tender documents, i.e the Bills of Quantities is not complete enough for us to price and submit a competitive tender price. One, the scope in the BOQ is not in complete harmony/agreement with what is shown in the Tender Drawings. More specifically, the fence shown on the said drawings is not fully described in the BOQ, only the Razor wire is in the BOQ leaving to wonder whether the Other component of the steel fence are existing! Besides the flow/sequencing of the BOQ items leads to a suggestion of some missing items, e.g items J, M, O, P, R, S, T, U, W and X.	Bidders were conducted to the powerstation and well head installations during the site visit. All clarifications regarding the scope and extent of the works were explained during the site visit. The scope of works for the fencing works entails provision and installation of the razor wire to the existing the wellhead and powerstaion fences, site clearance, topsoil stripping and construction of a reinforced concrete toe beam for the existing fence.The Numbering and sequencing of the Bill items should be adopted as it is. There are no missing bill items. Bidders are advised to visit the KenGen website to get additional information/addendums posted by the Client.

2	The scope on the Design, Fabrication and Installation of Security Grills is not clear, as to extent, height, sections sizes and spacing, and the item cannot be priced as it is not in the BOQ.	This should be omitted. There will be no Design, Fabrication and Installation of Security Grills in this tender.
